

RITRANSPARENCY REPORT 2020

ENPAP - Ente Naz. Prev. e Ass. Psicologi

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the PRI website, ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

PRI disclaimer

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

Usage restrictions

Public Transparency Reports are the intellectual property of PRI. Under no circumstances, can this report or any of its contents be sold to third parties.

OO 11.3b If your org

If your organisation does not integrate ESG factors into investment decisions on your externally managed assets, explain why not.

Cash is not covered byh the ESG integration.

00 11.4

Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.

ENPAP published 'I Principi di investimento sostenibile e responsabile dell'ENPAP' that explains its responsible investment policy:

"Integrated" approach ENPAP believes that its ESG policy must pervade the entire investment process, in all its phases. In particular: a) Selection of managers / financial instruments b) Monitoring of the ENPAP portfolio - verification of the "ESG rating" for all financial instruments for which this assessment metric is available c) Annual reporting to ENPAP "stakeholders" of "quality "Overall of their investments from the point of view of" social responsibility "and their" sustainability ". d) "Proactivity" ENPAP considers it essential to combine its action synergistically with that of other institutional investors and the most important international organizations specialized in the issue of "responsible" and "sustainable" investments, in order to encourage the dissemination and continuous improvement of these practices. To this end, ENPAP: a) will participate as a signatory in the "United Nations Principles for Responsible Investments (UNPRI)"; b) participate in the initiatives of qualified associations and multilateral bodies operating in the field of "sustainable" and "responsible" investments.)

Flexible and future-oriented approach ENPAP considers its principles of "sustainable" and "responsible" investments as a set of flexible and constantly evolving values, in accordance with the best practices recognized from time to time and in relation to future regulatory changes scientific and market, with particular reference to the initiatives of the European Commission ("Action Plan for Financing Sustainable Growth"). In this sense, this document will be subject to review, at least every three years, by the Board of Directors on the proposal of the Investment Commission.

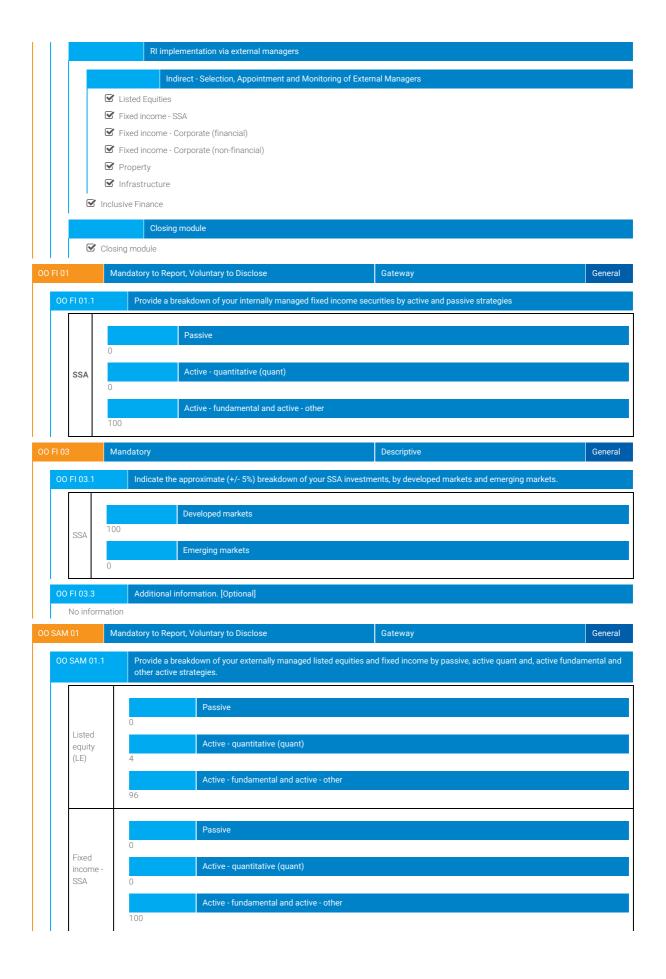

ENPAP "SRI - Sustainable and Responsible Investment" consist of: "exclusion" criteria "inclusion" criteria The combined use of these criteria allows identification of the so-called "Investable universe", or the set of financial instruments that ENPAP can take into consideration in its investment process, without prejudice to the additional criteria provided for by general and internal regulations. 2.1 "Exclusion" criteria Using the "exclusion" criteria, ENPAP identifies a "list" of companies / production sectors / countries which it intends to exclude from its "investable universe". The reasons that led to the identification of these "criteria" are mainly of an "ethical" nature, that is, they respond to certain "principles and values" that ENPAP considers to be fundamental in its action as an institutional investor, "non-negotiable" not even from the perspective of a optimal risk / return profile.

Countries exclusion criteria: States (and companies that have their registered office) are excluded from the investable universe: a) which do not guarantee respect for civil rights (human rights and religious freedom); b) which do not guarantee respect for political freedoms (freedom of expression and association).

Companies exclusion criteria: The following are excluded from the investable universe: a) which do not guarantee compliance with the principles contained in the ILO (International Labor Organization) Convention on the protection of child labor; b) which do not guarantee respect for equality between men and women in work and in remuneration policies; c) whose turnover derives from carrying out an economic activity in the following fields: Development, production, storage and sale of: nuclear, biological and chemical weapons of mass destruction or parts of them; chemical, biological and radioactive material toxic agents; missiles capable of carrying weapons of mass destruction; fragmentation weapons and anti-personnel mines; Gambling Pornography d) who have been convicted of serious violations of the anti-money laundering and anti-terrorist financing legislation.

Inclusion criteria The evaluation of an issuer of a financial instrument according to "ESG criteria" has the purpose of providing a reliable judgment on the policies adopted by the issuer with respect to the following three main issues: a) Environmental («Environmental») Impact on climate change, energy sources used, environmental sustainability of the production carried out. b) Social («Social») Respect for human rights and workers' rights, workplace safety, fair pay policies, consumer protection policies. c) Corporate governance ("Governance") Structure of the management model, relations with employees and shareholders, relations with "stakeholders", adoption and concrete application of procedures (code of ethics, code for the management of conflicts of interest, etc.) aimed at avoiding negative behavior (corruption, scam, money laundering, false social communications, etc.). For investments represented by shares or stakes in share capital, debt securities or mutual funds / SICAV shares, only financial instruments that have an "ESG rating" deemed satisfactory, or at least equal to "BB "(according to the" MSCI ESG Ratings "metric) or at least equal to "Limited" (according to the "VIGEO EIRIS "valuation metric) or equivalent.

		a of Carbon Footprint analysis and the corporates p		
	oluntary/			(
14.6 CC	Provid	e further details on the key metric(s) used to assess	climate-related ris	ks and opportunities.
Metric Type	Coverage	Purpose	Metric Unit	Metric Methodology
Carbon footprint (scope 1 and 2)	Majority of assets	It represents the normalized emissions of a portfolio per million euro invested. In other words, it shows the carbon footprint of each million of euro invested.	t CO2eq/€M	For Equity portfolio Scope 1 and Scope 2 GHG emissions are allocated using the equity owner approach. For Bond portfolio emissions are all the total issuer's outstanding debt (emissions allocated to lenders) - the ownership approach applied but from the debt/lender perspective. ∑ invested / Total Assets)*CF/Total portfolio invested CO2eq/€M
Portfolio carbon footprint	Majority of assets	The absolute greenhouse gas emissions associated with a portfolio, expressed in tons CO2e. It is used to communicate the carbon footprint of a portfolio, to track changes in GHG emissions in the portfolio and for portfolio decomposition and attribution analysis.	t CO2eq	For Equity portfolio Scope 1 and Scope 2 GHG emissions are allocated using the equity owner approach. For Bond portfolio emissions are all the total issuer's outstanding debt (emissions allocated to lenders) - the ownership approach applied but from the debt/lender perspective. Invested / Total Assets)*CF = t CO2eq
Total carbon emissions	Majority of assets	Assessment of the exposure in fossil fuel activities such as tar sands and oil shale, coal mining, coal fuelled powered generation etc.	% of investments	This metric focuses on a portfolio's exposure to and industries considered the most GHG emissintensive (\(\subseteq \text{current} \) value of investments in corwith fossil fuel exposure/ current value of the part of the
Carbon intensity	Majority of assets	This measure represents the absolute emissions of the average company financed by the investor	t CO2eq	Scope 1 and Scope 2 GHG emissions are alloc based on portfolio weights. ∑weight in portfoli CO2eq

			Asset Managers are required to complete Unpri Transparency Report which allows ENPAP to assess how they incorporate ESG					
			into their investment process. Key areas are: 1) How managers integrate ESG into their investment process					
		Scope and process	2) What internal and external resources relating to research are used					
		·	3) What policies and procedures around engagements and proxy voting are in place					
			4) Responsible Investing policy, firms commitment, disclosure of RI activities					
			Based on these Key areas managers are assigned a score related to the ESG practices, which addresses ENPAP to select the asset manager.

FI 01.2 Describe your reasons for choosing a particular ESG incorporation strategy and how combinations of strategies are used.

ENPAP believes in all kind of freedom granded by a Nation. In line with this value, the Government ESG investment policy is base on the exclusion of Nations that violate political, civil rights and religious freedom. The strategy works on 5 specific indicators linked to below mentioned Internation! Norms and countries are selected on the basis of their committement:

- International Covenant on Civil and Political Rights, 1966
- Optional protocol to the International Covenant on Civil and political rights, 1966
- 2nd Optional protocol to the International Covenant on Civil and political rights (on death penalty), 1989
- Worldwide Governance indicators: Political Stability and Absence of Violence
- Religious Freedom: Government Restrictions Index
